RFP090051

"U.S. BOTANIC GARDEN TERRACE GARDEN (RAIN GARDEN)" RFP NO. 090051

Questions and Government Responses

Question 1: Please confirm we are pricing Phase A only. In the meeting this was requested, but the drawings show all phases. Not sure if you wanted all pricing broken out by phase.

Response: Pricing is for Phase A only. The General Requirements and Summary of Work outline the work associated with this solicitation.

Question 2: In the site meeting it was verbally stated the existing plants would be removed by another contractor along with the temporary display. Please confirm this is the case, since the demolition drawing does not show any demolition for phase A other than protecting the existing trees and note 2 for the yard hydrant.

Response: Yes, existing plants will be removed by others, all but the turf and trees shown on the plans. See specification Section 011000 - Summary of Work, Part 1.6, Work By Government.

Question 3: In the meeting it was discussed that a construction fence should be provided around phase A with slats. Please confirm 6 foot high metal fence with blocks and visibility slats are to be provided.

Response: See General Requirements - Section 010000, page 18, Baricades and Fences for details; the fence is to be 8 foot high.

Question 4: Is any yard inlet protection required? I could not find any reference to specific yard inlets and the type of protection for phase A.

Response: There are not any existing yard inlets in phase A, a perimeter silt fence is required in locations shown on sheet C103 of the construction drawings; see sheet C501 and the specifications for details.

Question 5: Please note the solicitation calls for 6 options while the specifications call for two. Per the meeting we will proceed with the 6 as discussed.

Response: Please price all that are listed, there are 2 Options and 3 Unit Prices, the two may have been confused.

Question 6: Is the government providing the testing for concrete and soil compaction or is this to be provided by the contractor?

Response: Contractor is to provide the required submittals as detailed in the specification

sections through independent testing laboratories (e.g., concrete cylinder test

results, density and moisture soil tests reports).

Question 7: How many days are required to notify the contractor of a change? This is blank

on page 17 of 57.

Response: This clause does not apply. Remove from Solicitation.

Question8: On page 18 of 57 the number of days the contracting officer has to respond to a

change is blank. Please provide.

Response: This clause does not apply. Remove from Solicitation.

Question 9: On pg 32 of 57 submittals is discussed. Please confirm the turnaround time for

the A/E for the project. The time frame from award to start of construction is only a month. Submittals need to be turned around in 5 days by the A/E. Please

confirm.

Response: Review can be expedited and returned within 5 days of receipt for items

marked 'Critical'.
